Location: Bengaluru, India

SUMMARY

AI Engineer with 7 years of full-stack engineering behind the AI work. I build production AI systems: agentic workflows, RAG pipelines and LLM-powered products that have to ship, scale and hold up in enterprise environments. As Technology Lead at Synechron, I lead development of DuBuy-IT, an AI-powered BRD Builder for Emirates NBD. It turns conversations, existing documents and partial notes into complete, validated business requirements documents, using LangGraph orchestration, RAG on vector databases and MCP tool integrations on a React, Node.js and MongoDB stack.

Before AI, I spent five years on enterprise platforms where reliability wasn't optional: core-banking onboarding on Oracle FLEXCUBE, real-time pricing analytics for Best Western, and a CRM-Salesforce sync platform at Adobe handling 1M+ records a month at 99.9% availability. That's why I design AI systems for latency, failure handling, auth and multi-tenancy from day one. Open to AI Engineer, GenAI Engineer and MERN / full-stack AI roles.

7 yrs Full-stack & platform engineering	1M+ / month Records synced at Adobe	99.9% Availability, <30 s sync latency	Agentic AI LangGraph + RAG BRD Builder for Emirates NBD
---	---	--	---

CORE SKILLS

AI / GenAI	LLMs, Agentic AI, AI Agents, RAG, Prompt Engineering, Embeddings, Vector Databases, Transformers
Frameworks	LangGraph, LangChain, MCP (Model Context Protocol), OpenAI API
Backend	Python, FastAPI, Node.js, Express, TypeScript, GraphQL (Apollo), REST, event-driven processing
Frontend	React, Redux Toolkit, Material UI, Highcharts
Data	MongoDB, PostgreSQL, Azure Cosmos DB, AWS Redshift, Prisma, Kysely
Cloud & DevOps	Microsoft Azure (Functions, Logic Apps), AWS, Docker, Git, CI/CD
Quality & Security	Jest, Jasmine, RBAC, multi-tenant isolation, Adobe IMS authentication

EXPERIENCE

Technology Lead · Synechron Jul 2026 – Present · Bengaluru
DuBuy-IT: AI-Powered BRD Builder (client: Emirates NBD)
Leading development of an agentic AI platform that takes business requirements from first conversation to a validated, structured BRD.

- Architected multi-step agentic workflows in **LangGraph** for intent classification, requirement extraction, validation and conversation-state management across long-running, multi-turn sessions.
- Built **RAG pipelines on vector databases** so the system drafts from existing documents and partial requirements, not just a blank page.
- Developed AI-driven gap detection, requirement validation and vendor neutralization to raise BRD quality before human review.
- Designed conversational flows for both IT and non-IT BRDs with structured output generation.
- Integrated **LLMs and MCP tools** into a scalable React, Node.js and MongoDB architecture.
- Partnered with business analysts, product and engineering teams to turn manual BRD writing into a guided AI workflow.

Stack: Python, LangGraph, LangChain, MCP, LLMs, RAG, Vector Databases, Prompt Engineering, React, Node.js, MongoDB

Senior Software Engineer · TEKsystems Global Services (client: Adobe) May 2024 – Jul 2026 · Bengaluru
Built enterprise platforms for two Adobe business units: Rapid Business Enablement (RBE) and Sales Platform Engineering.

Opportunity Sync (RBE)

- Built a real-time, bidirectional opportunity sync between Adobe's Salesforce and 4+ CRM systems (Workfront, Magento, Marketo, Frame.io).
- Designed event-driven processing on Azure Functions, Cosmos DB and Hoolihan Message Queue.
- Processes **1M+ records/month at 99.9% availability**, with **under 30 s sync latency** and **99.5% writeback success**.
- Zero issues reported through a high-traffic quarter-end, which earned the GRIT Award 2024.

Brainsales Rule Engine

- Built a visual business-rule platform on DMN 1.3/1.5 that lets non-technical users author and validate rules in real time.
- Integrated KIE and IBM BAMOE editors with RBAC, multi-tenant isolation and Adobe IMS authentication.

Approval Process Platform

- Built a drag-and-drop approval-workflow builder with visualization, real-time execution, complex approval chains, RBAC and IMS auth.

Stack: React, TypeScript, Redux Toolkit, Node.js, Azure Functions, Cosmos DB, AWS, Salesforce APIs, REST, DMN, Adobe Spectrum, Adobe IMS, Jest

Software Engineer · TEKsystems Global Services (client: Best Western)

Jul 2022 – May 2024 · Bengaluru

Built a data-driven pricing analytics platform that optimizes hotel room rates from market trends and competitor data.

- Designed secure, high-performance **Node.js and Express APIs** plus a **GraphQL** layer with Apollo Client.
- Modeled analytics data on PostgreSQL and AWS Redshift for scalable storage and querying.
- Built real-time pricing dashboards with React, TypeScript, Redux, Material UI and Highcharts.
- Improved performance through server-side rendering and API response optimization.
- Ramped up quickly on Node.js to own complex backend services, which earned a Spot Award.

Stack: React, TypeScript, Redux, Node.js, Express, GraphQL, Apollo, PostgreSQL, AWS Redshift, Prisma, Kysely

Associate Application Developer · Oracle Financial Services Software

Aug 2019 – Jul 2022 · Bengaluru

Oracle FLEXCUBE: customer onboarding for core banking

- Modernized onboarding for Savings, Business Loan and Vehicle Loan accounts in React, Redux and TypeScript, aligned to Oracle Redwood design.
- Implemented configurable business-product setups and a reusable component library.
- Maintained **90%+ unit test coverage** with Jasmine and Jest; delivered in Agile/Scrum with Product and QA.
- Member of the UI Enhancement Team that received the Power of One Award.

Stack: React, Redux, TypeScript, Node.js, Express, MongoDB, HTML, CSS, Jasmine, Jest

PROJECTS

HireReady AI · AI interview coach **IN PROGRESS**

Upload a job description and resume; get a realistic, role-tailored voice mock interview. Planned: RAG-generated questions from the JD and resume, a LangGraph agent that adapts follow-ups, LLM-based answer scoring, and a personalized study plan.

Stack: React, TypeScript, Node.js, Python, FastAPI, LangGraph, OpenAI, Vector Database, MongoDB

QueryMind · Talk to your database **IN PROGRESS**

Ask in plain English; an agent writes the SQL or MongoDB query, runs it safely and answers with a table or chart. Planned: schema-aware text-to-query via RAG over metadata, a LangGraph plan-check-self-correct loop, read-only guardrails and row limits, and MCP connectors for PostgreSQL and MongoDB.

Stack: React, TypeScript, Node.js, Python, FastAPI, LangGraph, MCP, PostgreSQL, MongoDB, OpenAI

EDUCATION

Master of Computer Applications (MCA)

National Institute of Technology, Tiruchirappalli · 2016 – 2019 · Grade: 8.36

- Winner, Codesbit 2018, a pan-India coding challenge
- PPC committee member, Version 17 (national-level event, Dept. of Computer Applications)

Bachelor of Computer Applications (BCA)

Sikkim Manipal University – Distance Education · 2012 – 2015

AWARDS

- **GRIT Award 2024** – TEKsystems, Adobe account
- **Spot Award** – TEKsystems, Best Western account
- **Power of One Award** – Oracle (UI Enhancement Team)

CERTIFICATIONS

- What Is Generative AI?
- Generative AI vs. Traditional AI
- Server-side Development with NodeJS, Express and MongoDB
